About SBI

Founded in 1806, Bank of Calcutta was the first Bank established in India and over a period of time evolved into State Bank of India (SBI). SBI represents a sterling legacy of over 200 years. It is the oldest commercial Bank in the Indian subcontinent, strengthening the nation’s trillion-dollar economy and serving the aspirations of its vast population.

The Bank is India’s largest commercial Bank in terms of assets, deposits, branches, number of customers and employees, enjoying the continuing faith of millions of customers across the social spectrum.

SBI headquartered at Mumbai, provides a wide range of products and services to individual customers, commercial enterprises, large corporates, public bodies and institutional customers through its various branches and outlets, joint ventures and subsidiaries.

VISION

At State Bank of India (SBI), we are firm believers of the ‘Reform, Perform and Transform’ mantra. We are passionately driven to meet the future needs of a transforming India and are guided by our unflinching commitment towards sustained value generation.
India is going through a remarkable transformation. Ease of doing business, mega tax reforms, financial inclusion, universal health insurance, mass digitalisation, infrastructure development and the growth of manufacturing and service sectors are just some of the change enablers. More so, the country currently enjoys prudent fiscal conditions, stable inflation, growing trade and steady employment creation to support sustainable GDP growth. Not surprisingly, the country is in the spotlight globally.

Focused on value creation, SBI has made strategic investments to strengthen its core businesses. Over the last 5 years, we have undertaken several initiatives in reshaping SBI into a technologically advanced universal banking institution, with optimised operational efficiency and with ‘delighting customers’ as its strategic driving priority.

Today, these transformative initiatives have made SBI highly competitive and relevant to its diverse base of customers. With this backdrop, we are now ideally positioned for delivering superior value creation through sustainable growth. We plan to fulfil this by enhancing our operations to the highest levels of excellence - be it lending performance; improving our asset quality; perk up our profitability; and ultimately hastening the pace of capital generation and, thus, wealth creation.

To power these efforts, we have made our own infrastructure extra robust, in terms of establishing a comprehensive monitoring and control framework, and building on a large talent pool of committed workforce. To support this, we have re-engineered our internal processes for improving our risk management and growth velocity. We are also constantly recalibrating our lending strategy to bolster the quality of our loan book.

As a proxy to India’s economy, we are building steady momentum to become even more emblematic of the resilience and transformation of the Indian economy.

Technology advancements are continuously being implemented both towards back-end processes, as well as robust and efficient customer service delivery channels. At the same time, our commitment to highest standards of risk management, ethics and governance safeguard our stakeholder’s interests at all times. Through this upgraded framework, we have laid a strong foundation for sustained long-term growth, and are gradually moving towards a more transparent, cost-competitive, and innovation-driven organisation.

We are beginning to see clear signs of benefits from the merger with our associate banks, having unified multiple operations to match the highest standards, and stimulating superior synergistic performance. Going forward, an enhanced scale of operations, sharing of best practices and the rationalisation of common costs are expected to result in meaningful savings. This will further strengthen our mission for becoming an enduring value creator.

We are optimistic about the future. The success of the largest ever QIP floated in India by SBI, is a strong testimony to the faith reposed in us by our investors and to our capital raising capability overall. The QIP enjoyed wide participation by diverse sets of quality investors. Furthermore, the IPO of SBI Life, led to significant value discovery and is a strong indication of the Bank’s ability to incubate and nurture future industry leaders with a strong potential for value creation in the times ahead.

The Bank is deeply committed to contributing to society at large. We will continue to serve as a trusted partner to all our stakeholders by responsibly providing financial services that enable growth and economic progress for people of all income groups. During major transformational reforms seen in the past, such as the Government’s demonetisation measures and the tax reforms through the introduction of GST, the Bank has emerged as a resilient player on a steady path of quality growth.
Embracing Technological Advancements, to consolidate our Digital Banking Leadership.

A Transforming India is digitally savvy and has high expectations from the banking industry. We are committed to develop, deploy and maintain technology solutions that are stable, reliable and deliver what the business needs to optimise customer satisfaction and value creation.

We are committed towards transforming ourselves into a digitalised organisation, supported by technology enabled backend operations.

India is undergoing a digital transformation and witnessing an accelerated pace of innovation and technology adoption. As the digital economy is flourishing, the Bank is also progressing with its technological advancements and growing its presence in multi-channel platforms, keeping itself ahead of the curve. Consequent to our digital initiatives, we have improved the share of digital transactions as a percentage of total transactions by over 600 bps during the year.

During FY2018, we launched an integrated omni-channel digital platform YONO as an integral part of our digital drive. This is India’s first fully digital service platform designed to facilitate banking as well as lifestyle needs of our customers through an all encompassing B2C marketplace. Apart from banking services, the application is designed to offer other financial products including investments, insurance and credit cards.
This path-breaking product has been developed using the latest digital technologies.

We are also committed towards transforming ourselves into a digitalised organisation, supported by technology enabled backend operations. Along with the digitalisation of consumer facing operations, we continue to invest in the automation of our internal processes to improve efficiency, reduce cost of operations and re-deploy employees in revenue accretive roles.

With an all-pervasive digital transformation taking hold, we are highly motivated to integrate and absorb multiple technologies into our operational culture. The potential and the productivity of new age technologies like block chain, machine learning, artificial intelligence and IoT with data and analytics as their foundation have been recognised by the Bank. Centres of excellence, proofs of concept and a collaborative and definitive time bound plan with fintech companies and vendors has been put in place to harness and harvest the benefits of these technologies for greater customer engagement, enhancing productivity of the Bank and empowering our employees. We are continuously training our employees to keep them updated on the technology front, and this enables them to deliver new-age banking for an aspiring and transforming India.
Progressively Enhancing Asset Quality and Processes, through Efficient Risk Management.

To be able to serve a transforming and demanding India, we need to be a strong bank with the best risk management practices. Going forward, we are making creditable progress in risk assessment and management, while working diligently to resolve legacy stressed assets.
It is incumbent upon us to ensure that our business operations remain fully compliant with laid down procedures and regulatory requirements. Over time, we have evolved a robust risk management model aligned with regulatory standards and international best practices. Our policies and procedures are in place to measure, assess, monitor and manage risks systematically across all our portfolios. We have undertaken initiatives to inculcate a risk and compliance culture across the organisation by imparting extensive training.

We are actively recognising and addressing the legacy credit issues, while striving to ensure that the new origination is well de-risked. Furthermore, a large proportion of our stressed assets are under various resolution processes. These eventual resolutions will further improve our asset quality metrics meaningfully, and also make way for credit expansion and growth.

At SBI, we have been proactive towards making the banking system efficient and credible, which is essentially a prerequisite for stronger economic growth of our country.
Ability to Build Valuable Businesses to create Future Value for Stakeholders.

Our position in the Nation’s financial system enables us to create scalable and profitable business models in the financial ecosystem.

As part of a strategy to meet capital needs as well as global risk norms, from time-to-time the Bank aims to monetise certain assets by partially divesting stake in select subsidiaries.

During the year, we divested a part of our stake in SBI Life through a highly successful initial public offering. As the largest public offer in the past seven years, at the time of listing on 3rd October 2017, SBI has demonstrated remarkable ingenuity in creating India’s largest private life insurer in terms of new business premium (NBP) generated every year since FY2010.

SBI sold 8% of its stake in the IPO of SBI Life valuing SBI Life at ₹ 70,000 crore, thereby enabling SBI to add to its capital to support growth. This IPO stands as a strong testimony to SBI’s capabilities in institution building and value discovery.

The Bank has many similar subsidiaries which have the potential to deliver future value. Over the years, the Bank has built value in various lines of business through its subsidiaries and investments in non-core assets. These non-core assets are fundamental to the nation’s financial markets’ infrastructure.

₹67,825 crore as on 31st March, 2018 Market Cap of SBI Life

62.10% Bank’s current Stake in SBI Life

₹5,436 crore Raised by 8% Stake Sale of SBI Life through IPO
A Transforming India will need strong financial institutions beyond banking. SBI owns and manages several Non Banking Subsidiaries that are amongst industry leaders in their own right. As in the case of partial divestment and subsequent IPO of SBI Life in FY2018, we believe that we will be able to unlock huge value in these businesses.
Unlocking the Potential of our Human Capital, through structured Skill Development.

We are directing our efforts towards imparting continuous training on skill development and enhancing job knowledge.

People are our most valuable asset and nurturing their capability is at the core of driving business excellence and meeting the demands of a Transforming India. To improve the profitability and efficiency of the Bank, our concerns are also towards improving our productivity. We are directing our efforts towards this by imparting continuous training on skill development and enhancing job knowledge. This will empower us to offer excellent customer service and aid us in achieving our targeted performance. In this connection, we have established a state-of-the-art “State Bank Institute of Leadership” (SBIL) at Kolkata, for imparting world class training to senior executives of the Bank. In addition to this, we also have a robust enterprise wide training system, which caters to all employees of the Bank and prepares them to stay ahead of the curve. Specialised in house training establishments in the areas of Credit, International Banking, Risk, Marketing, Rural Banking, IT, Leadership and Human Resources, among others, have been created to ensure that the Bank’s training systems is in sync with its growing needs.

During the year, we implemented a reward and recognition scheme which seeks to reward high performers. Performance Linked Incentives have also been rationalised and dashboards are provided to all employees to help them track their own progress. We are targeting to bring over 95% of our employees under measurable roles to streamline their performance evaluation objective and ensure their systematic career development.

Our thrust is on identifying potential leaders and investing in their development, in order to create a leadership pipeline for succession. In addition to this, with streamlined recruitment process, average age of officers and associates are declining. The Bank aims at inducting young members while maintaining the overall manpower at optimal level, based on profit and cost projections.

As the Indian economy is witnessing a transformation, we are making ourselves more agile on the path of innovation and knowledge. This ensures that we are future-ready for India’s journey of transformation.

Average Training Man-hours per Employee

50 hrs.
A Transforming India requires modern and capable institutions to help realise its aspirations. For SBI, this means having strong capabilities and a value based culture within our people. We continue to be focussed on embedding an ethical and value based culture throughout the organisation, which is at the core of our strategy and processes.
Driving Change to focus on Sustainable Growth.

To be worthy of serving a Transforming India, we ourselves need to have a strong introspective culture with the goal of being a strong and high-performing bank. With our new internal budgeting processes, we’re making sure that every aspect of our business optimises our customer service levels, our risk management, and our returns to our stakeholders. With this result orientated discipline, we can play a pivotal role in catalysing India’s transformation.
With a focus on risk adjusted return maximisation, we have completely revamped our budgeting processes.

“With defined strategies in place, it will be our endeavour to report positive outcomes for each of these parameters over the medium term.”

At SBI, we are building a sound culture of risk adjusted profit based as well as customer-centric budgeting. The exercise of running our business based on risk adjusted return is intended to guide us towards return maximisation, risk mitigation and capital conservation.

This transformation is a pre-requisite to weather the challenges surrounding the banking sector, with efficiency and profitability parameters remaining under pressure.

We have re-organised our budgeting process by setting targets on key parameters, with granular roadmaps. Our efficiency parameters for the medium term include improving Return on Assets; Return on Equity; Cost to Income Ratio; Net Interest Margins (NIMs); and Credit to Deposit ratio, among others. Business units are similarly expected to target Returns on Risk weighted assets.

With defined strategies in place, it will be our endeavour to report positive outcomes for each of these parameters over the medium term.
