#### **The awarding of contract is based on the following:**

- The eligible bidder(s), who secured more than 85% marks in TS of Appendix-B2, shall be intimated to participate in the Reverse Auction (RA).
- Among all qualified bids, the lowest bid (discovered through Reverse Auction) will be termed as L1. If L1 is from a local supplier, the contract for full quantity will be awarded to L1.
- If L1 bid is not from a local supplier, the Bidder will be selected as L1 on the basis of lowest rate per license quoted in Reverse Auction and allocated 50% of the number of licenses i.e. 1500 assured licenses (including existing deployed licenses if any) before the end of the third year of the contract period. Thereafter, the lowest bidder among the local suppliers, will be invited to match the L1 price for the rest 50% i.e. 1500 number of licenses subject to the provisions of Make in India Order 2017 and local supplier's quoted price falling

within the margin of purchase preference. Contract for the above-mentioned quantity shall be awarded to such local supplier subject to matching the L1 price.

- iv. In case such lowest eligible local supplier fails to match the L1 price or accepts less than the offered quantity, the next higher local supplier within the margin of purchase preference shall be invited to match the L1 price for remaining quantity and so on, and contract shall be awarded accordingly. In case local supplier matches the price of L1 bidder and the said number of APM licenses, L1 bidder would be allocated 1500 assured licenses.
- v. In case some quantity is still left uncovered on local suppliers, then such balance quantity will be awarded to L1 bidder upto 3000 number of licenses. If Bank requires any further APM licenses, the user department may approach any of the onboarded bidders i.e. L1, L2, L3 etc. (except the highest bidder) provided L2, L3, etc. match the price of L1 bidder.

**Scope of Work and Payment Schedule**

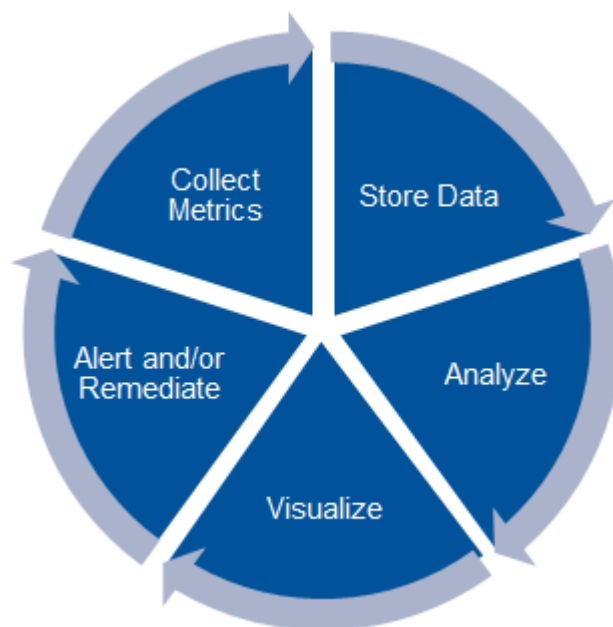

The Bank's vision is to have an Enterprise wide, Application Performance management tools, for all servers and application monitoring needs - end user applications, and underlying infrastructure components such as application servers, databases, middleware & messaging components, web servers, web services, virtual systems and cloud resources.

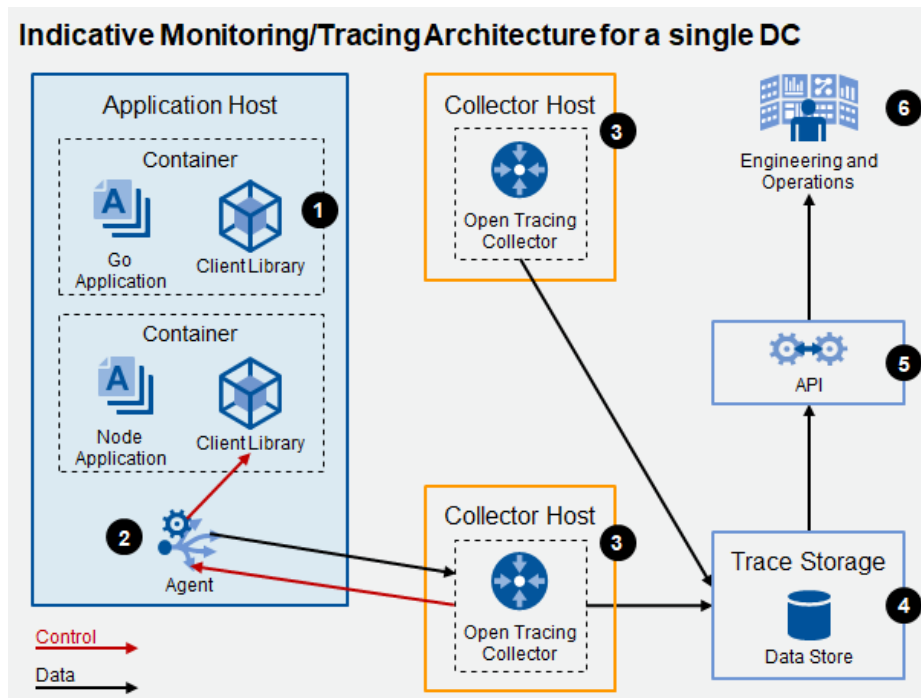

Bank needs an Application Performance Management license tool, with total visibility - from the URL to the line of code. Two sets of performance metrics are required to be closely monitored:

1. Performance experienced by end users (both front end and back end) of the application.
2. Performance metrics measures the computational resources used by the application for the load, indicating whether there is adequate capacity to support the load, as well as possible points/locations of a performance bottleneck.

The proposed APM license tool should also broadly cater to the following requirements:

1. Monitoring to meet the three functional dimensions of digital experience monitoring (DEM); application discovery, tracing and diagnostics (ADTD); and application analytics (AA).
2. Applying data-driven analytics and ML technology to enhance the effectiveness of monitoring.

The proposed APM license tool should help the Bank monitor all the components at all layers for an optimal, application delivery and helps to improve the end user experience at the last mile. The tool strives to detect and diagnose complex application performance problems to maintain an expected level of service.

The proposed Application Performance Monitoring (APM) license tool should aim at providing comprehensive monitoring at all levels, including synthetic monitoring as well as end-user experience monitoring and provides analytics for issue tracking, auto ticketing and predicting issues and integrate with various platforms / application systems in the State Bank Group. It is categorized in two groups viz., Bidders' role and Tool's role.

The selected Bidder(s) has to-

- Supply of the proposed APM tool licenses as mentioned in the RFP.
- support the end-user departments in the deployment, integration, configuration of the proposed APM tool licenses with their respective applications.
- comply with all the recommendations / close all the vulnerabilities reported in the various security review, IS audit, UAT, etc. conducted by the Bank, regulators, Bank appointed third parties at various stages during the contract period without any additional cost to the Bank. Bank shall not pay any charges to the vendor failing the above and it may attract penalty from the Bank (as per the SLA).
- Provide services at all SBG places including all the SBI Data Centers located across various locations in the Country/ out of country.

- e) provide training to the identified resources from the Bank.
- f) perform configuration / customization / modifications or adding new dashboards / alerts for getting more clarity into the issues.
- g) Provide updates and upgrades of the product during the entire contract period, at no additional cost to the Bank

The scope of proposed APM license must include the features as accepted by the bidder in Appendix-B and Appendix-C of this RFP document.
