Decision of the Bank based on lowest quote received after reverse auction in this regard shall be final and binding.

12. No advance Payments shall be made.

13. Contractor shall have to give his program of work well in advances that if considered necessary by Bank's so that Bank may depute his representative.

14. **Successful bidder must COMPLETE the job within 15 days from the date of letter of intent. If the bidder fails to start the job in this period, Bank reserve right to cancel the work order and forfeit earnest money.**

17. **Income tax, WCT, TDS ON GST or any other tax in accordance with tax regulations shall be deducted from payments to be made to contractor.**

18. **If contractor fails to complete the work in stipulated time frame, then the Branch / RBO/ Bank's Engineer reserves right to get the remaining portion of work to be got done from any other agency at the risk and cost of the contractor in addition to forfeiture of earnest money.**

19. **The Bank reserves right to reject any or all the TENDERS without assigning any reason thereof.**

Sl.No.	Technical Specifications desired (In brief)
1	All the technical specifications <u>shall be strictly complied with IS 550 (Part-1, 2, 3)</u> of latest revision of BIS.
2	The Safe shall have <u>BIS Label</u> of Class AAA having Torch & Tool Resisting capacity on all six sides for minimum 90 minutes each.
3	The OEM must possess Valid BIS License to manufacture and supply the aforementioned TRTL safes (Class AAA).
4	All the surfaces of the safes before painting shall be thoroughly degreased and cleaned of rust and scales

	preferably by 12 tanks pickling process and treated chemically to prevent from rusting.
5	The Safe shall be painted inside and outside with an anti-corrosive primer followed by two undercoats of Paints and finally painted with quick drying paint, resulting into minimum 300 hrs of salt spray resistance.
6	The lock shall be dual control type and have at least 8 active levelers of brass of minimum 1.2 mm Thickness. There should not be any dummy (false) levers.
7	The OEM must be the Original Equipment Manufacturers of the Locks as per BIS 17566 used in the aforementioned Safe.
8	The safe should have a two-stepped lock case construction and in the closed position the gap at any place between the door edge and the frame shall not be more than 1mm and in locked position it shall not have a play of more than 1mm in the direction in which the door opens.
9	The outer and inner body of the safes should be made up of Mild Steel with Ultimate Tensile Strength (UTS) of at least 270 Mega Pascal (MPa). The total steel thickness across the walls of the safes shall be minimum 7 mm out of which the outer body plate shall be minimum 5 mm thick.
10	The thickness of door over the Bolt work should be minimum 80 mm.
11	The Safe shall have automatic relocking device for key fitted in the door which being always on guard shall come into operation if lock is dislodged by explosives or by other means.
12	Additional relocking device on primary lock apart from above relocking devices shall also be provided for Extra protection.
13	The thickness of the Torch and Tool resistant material in the body and door of the safe shall be minimum for Class AAA-100 mm.
14	The body shall be manufactured in multi-bend construction. The body shall be made so as to provide rebate on four sides. The construction of body shall be such that the resultant force of pull on the door is resisted by a member that is either an integral part of the body or is welded to the inner part of the body and not by any component part that is screwed or riveted.
15	The Safe shall have locking bolts of at least 32 mm diameter on the front as well as near edge of the door. In addition to this, the Safe shall also have locking bolts on the top and bottom edges of the door.
16	<p>The Biometric system should have provision for recording the normal finger and duress finger or numeric duress.</p> <p>a) In case of normal finger: After 3 unsuccessful attempts an SMS alert should be sent to min of 5 members.</p> <p>b) In case of duress finger: For first attempt itself an SMS alert is to be sent to min of 5 members.</p>

	Since the biometric is programmable, the exact configuration will be advised as per Branches requirement at the time of work order.
