BILL OF QUANTITIES FOR AIR-CONDITIONING WORKS OF SBI KOTGARH BRANCH NEW PREMISES, PHULBANI REGION.

Sl No	DESCRIPTION	QTY	UNIT	RATE	AMOUNT
				(in Rs)	(in Rs)
	AIR CONDITION	NING W	ORKS		
01)	Supply and installation of 4 way 4.0TR Cassette Type Air conditioner with scroll / Rotary / Twin rotary, having R32 /R37/ R410A (Eco Friendly) refrigerant including indoor unit outdoor unit, decorative grille and cordless remote and machine shall have copper condenser unit (Daikin/ Bluestar/ Carrier/ Mitsubishi/ O General/ Toshiba/ Trane & Hitachi)	3	No.s		
02)	Supply and installation of air cooled 1.5 TR HIGH WALL MOUNTED (BEE 3 STAR RATED) Type air conditioning units as specified; each unit shall comprise of separate Indoor and outdoor unit specified and as under: Indoor (fan coil) unit shall be Wall Mounted type and shall have proper insulated & leak proof condensate base connected. The outdoor (condensing unit) shall be of Corrosion resistant Galvanized powder coated or equivalent Sheet steel low vibration assembly installed on suitable vibration isolators and comprising of energy efficient Rotary compressor with copper condenser coils only. The rate shall include 3.0 mtr. of refrigerant pipe & electrical cabling for each machine. The above specified units shall be supplied & installed at locations as mentioned in the layout All machines shall be white in color. MACHINES SHALL HAVE LATEST STAR BAND VALIDITY (Daikin/ Bluestar/ Carrier/ Mitsubishi/ O General/ Toshiba/ Trane & Hitachi)	2	No.s		
03)	Supply and installation of air cooled 1.0 TR HIGH WALL MOUNTED (BEE 3 STAR RATED) Type air conditioning units as specified; each unit shall comprise of separate Indoor and outdoor unit specified and as under: Indoor (fan coil) unit shall be Wall Mounted type and shall have proper insulated & leak proof condensate base connected. The outdoor (condensing unit) shall be of Corrosion resistant Galvanized powder coated or equivalent Sheet steel low vibration assembly installed on suitable vibration isolators and comprising of energy efficient Rotary compressor with copper condenser coils only. The rate shall include 3.0 mtr. of refrigerant pipe & electrical cabling for each machine. The above specified units shall be supplied & installed at locations as mentioned in the layout All machines shall be white in color. MACHINES SHALL HAVE LATEST STAR BAND VALIDITY	3	No.s		
04)	Supply and installing timer unit for system room	1	No.s		

Condensing unit. It shall be made out of heavy gauge MS channels, angles, flats etc. of appropriate size & thicknesses duly painted with anti-corrosive paint. The entire item has to be executed us / req. of the machine Schizostich and the control of the control		I				
M.S. channels, angles, flats ecc. of appropriate size & thicknesses duly painted with anti-corrosive paint. The entire item has to be executed as / req. of the machine. Of Supply and laying pyc insulated copper connecting cable for indoor and outdoor unitifor Cassette ACS). Of Providing & Fixing of insulated PVC drain lines with litrile rubber insulation for various units in clamping manner above false ceiling & in concealed manner below false ceiling level. From the structural ceiling it should hanged using self threaded rods or shall be fixed on wall /beam etc. with clamps & the distance between 2 clamps shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be fixed with false ceiling members. It shall be had required gradient for easy disposal of the drain water & testing shall be done before filling the zuries. The drain line shall not be laid in the floor (except toilets & other utility areas where there are no electrical lines in the floor). All drain pipes of split / Cassatte air-conditioners should be PVC of suitable size as recommended by manufacturing company and it. Of Providing & Fixing Refrigerant copper piping for Hi-wall AC and Cassette AC laid between indoor & outdoor unit as per OEM's specifications (Beyond 3.0) R.Mit. for each Machine (applicable for split AC only) duly insulated with Class. "O' fire retardant sleeve type elastomeric intire tubber insulation. The item also includes copper electrical flexible cable of appropriate size. Alt. foil membrane shall be applied to provide resistance against breakdown due to UV radiation for exposed portion of the rubber insulation with Nitrogen testing (totally sealed - in case of proposed machine). It shall be in total cannelade manner below false ceiling is in total concealed manner below false ceiling is not the shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be fixed with false ceiling members.	05)	Providing & Fixing of M.S. Stand for cassette outdoor				
thicknesses duly painted with anti-corrosive paint. The entire item has to be executed as / req. of the machine with the machine of the machine case of the machine ca		, , ,				
thicknesses duly painted with anti-corrosive paint. The entire item has to be executed as 7 req. of the machine Research and the composition of the compos		M.S channels, angles, flats etc. of appropriate size &	3	No.s		
Ob. Supply and laying precinsulated copper connecting cable for indoor and outdoor unit(for Cassette ACs) Or) Providing & Fixing of insulated PVC drain lines with Nitrile rubber insulation for various units in clamping manner above false ceiling & in concealed manner below false ceiling evel. From the structural ceiling it should hanged using self threaded rods or shall be fixed on wall /beam etc. with clamps & the distance between 2 clamps shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be lifted with false ceiling members. It shall be laid required gradient for easy disposal of the drain water & testing shall be done before filling the zaries. The drain line shall not be laid in the floor (except toilets & other utility areas where there are no electrical lines in the floor). All drain pipes of split? Cassatte airconditioners should be PVC of suitable size as recommended by manufacturing company and it. Providing & Fixing Refrigerant copper piping for Hi-wall AC and Cassette AC laid between indoor & outdoor unit as per OEM's specifications (Beyond 3.0). R.Mtr. for each Machine (applicable for split AC only) duly insulated with Class. 'O' fire retardant sleeve type clastomeric nitrite rubber insulation. The item also includes copper electrical flexible cable of appropriate size. Als. Ioil membrane shall be applied to provide resistance against breakdown due to UV radiation for exposed portion of the rubber insulation with Nitrogen testing (totally sealed - in case of proposed machine). It shall be in total concealed manner below false ceiling general company of the Manufacturing company (DEM) only for each type of machine. The Supply & installation of \$kVA voltage stabilizer of stabilizing range 130V-270V. 10) Supply & installation of \$kVA voltage stabilizer of stabilizing range 130V-270V. 110 Providing & Fixing of Ms. Stand for Split AC outdoor Condensing unit. It shall be made out of heavy gauge Ms. channels, angles, flats etc. of appropriate size & thicknesses duly		thicknesses duly painted with anti-corrosive paint. The				
Ob. Supply and laying precinsulated copper connecting cable for indoor and outdoor unit(for Cassette ACs) Or) Providing & Fixing of insulated PVC drain lines with Nitrile rubber insulation for various units in clamping manner above false ceiling & in concealed manner below false ceiling evel. From the structural ceiling it should hanged using self threaded rods or shall be fixed on wall /beam etc. with clamps & the distance between 2 clamps shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be lifted with false ceiling members. It shall be in total concealed manner below false ceiling general company of the Manufacturing company (DEM) only for each type of machine. The Supply & installation of \$kVA voltage stabilizer of stabilizing range 130V-270V. 10) Supply & installation of \$kVA voltage stabilizer of stabilizing range 130V-270V. 110 Providing & Fixing of Ms. Stand for Split AC outdoor Condensing unit. It shall be made out of heavy gauge Ms. channels, angles, flats etc. of appropriate size & thicknesses duly		entire item has to be executed as / req. of the machine				
cable for indoor and outdoor unitifor Cassette ACs) Providing & Fixing of insulated PVC drain lines with Nitrile rubber insulation for various units in clamping manner above false ceiling & in concealed manner below false ceiling level. From the structural ceiling it should hanged using self threaded rods or shall be fixed on wall /beam etc. with clamps & the distance between 2 clamps shall be less than 1 meter. It shall not be placed over the false ceiling mor it shall be fixed with false ceiling members. It shall be laid required gradient for easy disposal of the drain water & testing shall be done before filling the zaries. The drain line shall not be laid in the floor (except toilets & other utility areas where there are no electrical lines in the floor). All drain pipes of spit / Cassatte air-conditioners should be PVC of suitable size as recommended by manufacturing company and it O8) Providing & Fixing Refrigerant copper piping for Hiswall AC and Cassette AC laid between indoor & outdoor unit as per OEM's specifications (Beyond 3.0 R.Mtr. for each Machine (applicable for spit AC only)) duly insulated with Class "O" fire retardant sleeve type clastomeric nitrite rubber insulation. The item also includes copper electrical flexible cable of apropriate size. Alu, foil membrane shall be applied to provide resistance against breakdown due to UV radiation for exposed portion of the rubber insulation with Nitrogen testing (totally sealed - in case of proposed machine). It shall be in total clamping manner above false ceiling & in total concealed manner below false ceiling & in total concealed manner below false ceiling & in total concealed over the false ceiling nor it shall be fixed with false ceiling it should hanged or shall be fixed with false ceiling it should hanged or shall be fixed with false ceiling with false ceiling with false ceiling & in total concealed manner below false ceiling & in total concealed manner below false ceiling & in total concealed manner below false ceiling & in total concealed ma		Praits conditions				
cable for indoor and outdoor untitfor Cassette ACs) 77) Providing & Fixing of insulated PVC drain lines with Nitrile rubber insulation for various units in clamping manner above false ceiling & in concealed manner below false ceiling level. From the structural ceiling it should hanged using self threaded rods or shall be fixed on wall /beam etc. with clamps & the distance between 2 clamps shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be lidd required gradient for easy disposal of the drain water & testing shall be done before filling the zaries. The drain line shall not be laid in the floor (except toilets & other utility areas where there are no electrical lines in the floor). All drain pipes of split / Cassatte air-conditioners should be PVC of suitable size as recommended by manufacturing company and it. 808) Providing & Fixing Refrigerant copper piping for Hi-wall AC and Cassette AC laid between indoor & outdoor unit as per OEM's specifications (Beyond 3.0 R.Mtr. for each Machine (applicable for split AC only).) duly insulated with Class ''O' fire retardant sleeve type elastomeric nitrite rubber insulation. The item also includes copper electrical flexible cable of appropriate size. Alu. foil membrane shall be applied to provide resistance against breakdown due to UV radiation for exposed portion of the rubber insulation with Nitrogen testing (totally sealed - in case of proposed machine). It shall be in total clamping manner above false ceiling & in total concealed manner below false ceiling & in total concealed manner below false ceiling & in total concealed manner below false ceiling & in total concealed over the false ceiling nor it shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be fix	06)		50	Mts		
Nitrile rubber insulation for various units in clamping mamor above false ceiling & in concealed mamore below false ceiling level. From the structural ceiling it should hanged using self threaded rods or shall be fixed on wall /beam etc. with clamps & the distance between 2 clamps shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be fixed with false ceiling members. It shall be laid required gradient for easy disposal of the drain water & testing shall be done before filling the zaries. The drain line shall not be laid in the floor (except toilets & other utility areas where there are no electrical lines in the floor). All drain pipes of split / Cassatte air-conditioners should be PVC of suitable size as recommended by manufacturing company and it Or Providing & Fixing Refrigerant copper piping for Hiwall AC and Cassette AC laid between indoor & outdoor unit as per OEM's specifications (Beyond 3.0) R.Mit. for each Machine (applicable for split AC only)) duly insulated with Class "O" fire retardant slewe type elastomeric intirie rubber insulation. The item also includes copper electrical flexible cable of appropriate size. Alu. foil membrane shall be applied to provide resistance against breakdown due to UV radiation for exposed portion of the rubber insulation with Nitrogen testing (totally sealed - in case of proposed machine). It shall be in total clamping manner above false ceiling & in total concealed manner below false ceiling level. From the structural ceiling it should hanged or shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be fixed with false ceiling grange 130V-270V. 10) Supply & installation of 5kVA voltage stabilizer of stabilizing range 130V-270V. 110 Supply & installation of 5kVA voltage stabilizer of stabilizing range 130V-270V. 111 Supply & installation of salva voltage stabilizer of stabilizing range 130V-270V. 112 Supply & installatio		cable for indoor and outdoor unit(for Cassette ACs)		14165		
manner above false ceiling & in concealed manner below false ceiling level. From the structural ceiling it should hanged using self threaded rods or shall be fixed on wall / beam etc. with clamps & the distance hetween 2 clamps shall be less than 1 meter. It shall not be placed over the false ceiling mor it shall be fixed with false ceiling members. It shall be laid required gradient for easy disposal of the drain water & testing shall be done before filling the zaries. The drain line shall not be laid in the floor (except toilets & other utility areas where there are no electrical lines in the floor). All drain pipes of split / Cassatte air-conditioners should be PVC of suitable size as recommended by manufacturing company and it O8) Providing & Fixing Refrigerant copper piping for Hi-wall AC and Cassette AC laid between indoor & outdoor unit as per OEM's specifications (Beyond 3.0 R.Mtr. for each Machine (applicable for split AC only)) duly insulated with Class "O" fire retardant sleeve type elastomeric nitrite rubber insulation. The item also includes copper electrical flexible cable of appropriate size. Alu. foil membrane shall be applied to provide resistance against breakdown due to UV radiation for exposed portion of the rubber insulation with Nitrogen testing (totally sealed - in case of proposed machine). It shall be in total clamping manner above false ceiling & in total concealed manner below false ceiling level. From the structural ceiling it should hanged or shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be less than 1 meter. It shall not be placed over the false ceiling nor of 5kVA voltage stabilizer of stabilizing range 130V-270V. 10) Supply & installation of 5kVA voltage stabilizer of stabilizing range 130V-270V. 11) Providing & Fixing of M.S. Stand for Split AC outdoor Condensing unit. It shall	07)	Providing & Fixing of insulated PVC drain lines with				
below false ceiling level. From the structural ceiling it should hanged using self threaded rods or shall be fixed on wall /beam etc. with clamps & the distance between 2 clamps shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be fixed with false ceiling members. It shall be fixed with false ceiling members. It shall be fixed with false ceiling members. The drain line shall not be laid in the floor (except toilets & other utility areas where there are no clertrical lines in the floor). All drain pipes of split / Cassatta air-conditioners should be PVC of suitable size as recommended by manufacturing company and it. Original AC and Cassette AC laid between indoor & outdoor unit as per OEM's specifications (Beyond 3.0). R.Mtr. for each Machine (applicable for split AC only) duly insulated with Class 'O' fire retardant sleeve type elastomeric intire tubber insulation. The item also includes copper electrical flexible cable of appropriate size. Alu. foil membrane shall be applied to provide resistance against breakdown due to UV radiation for exposed portion of the rubber insulation with Nitrogen testing (totally sealed - in case of proposed machine). It shall be in total clamping manner above false ceiling & in total concealed manner below false ceiling level. From the structural ceiling it should hanged or shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be fixed with false ceiling members. The diameter / gauge of the ref. pipe shall be as per the specifications of the Manufacturing company (OEM) only for each type of machine. The Opp Supply & installation of \$kVA voltage stabilizer of stabilizing range 130V-270V. 10) Supply & installation of false Action of the Manufacturing company (OEM) only for each type of machine. The heavy gauge M.S. channels, angles, flats etc. of appropriate size & thicknesses duly painted with anticorrosive paint. The entire item		Nitrile rubber insulation for various units in clamping				
below false ceiling level. From the structural ceiling it should hanged using self threaded rods or shall be fixed on wall /beam etc. with clamps & the distance between 2 clamps shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be fixed with false ceiling members. It shall be fixed with false ceiling members. It shall be fixed with false ceiling members. The drain line shall not be laid in the floor (except toilets & other utility areas where there are no clertrical lines in the floor). All drain pipes of split / Cassatta air-conditioners should be PVC of suitable size as recommended by manufacturing company and it. Original AC and Cassette AC laid between indoor & outdoor unit as per OEM's specifications (Beyond 3.0). R.Mtr. for each Machine (applicable for split AC only) duly insulated with Class 'O' fire retardant sleeve type elastomeric intire tubber insulation. The item also includes copper electrical flexible cable of appropriate size. Alu. foil membrane shall be applied to provide resistance against breakdown due to UV radiation for exposed portion of the rubber insulation with Nitrogen testing (totally sealed - in case of proposed machine). It shall be in total clamping manner above false ceiling & in total concealed manner below false ceiling level. From the structural ceiling it should hanged or shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be fixed with false ceiling members. The diameter / gauge of the ref. pipe shall be as per the specifications of the Manufacturing company (OEM) only for each type of machine. The Opp Supply & installation of \$kVA voltage stabilizer of stabilizing range 130V-270V. 10) Supply & installation of false Action of the Manufacturing company (OEM) only for each type of machine. The heavy gauge M.S. channels, angles, flats etc. of appropriate size & thicknesses duly painted with anticorrosive paint. The entire item		manner above false ceiling & in concealed manner				
should hanged using self threaded rods or shall be fixed on wall /beam etc. with clamps & the distance between 2 clamps shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be fixed with false ceiting members. It shall be fixed with false ceiting for one of ceveral direction of the drain water & testing shall not be laid in the floor (except toilets & other utility areas where there are no electrical lines in the floor). All drain pipes of split / Cassatte air-conditioners should be PVC of suitable size as recommended by manufacturing company and it wall AC and Cassette AC laid between indoor & outdoor unit as per OEM's specifications (Beyond 3.0) R.Mtr. for each Machine (applicable for split AC only)) duly insulated with Class "O" fire retardant sleeve type elastomeric nitrite rubber insulation. The item also includes copper electrical flexible cable of appropriate size. Alu. foil membrane shall be applied to provide resistance against breakdown due to UV radiation for exposed portion of the rubber insulation with Nitrogen testing (totally sealed - in case of proposed machine). It shall be in total clamping manner above false ceiling kevel. From the structural ceiling it should hanged or shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be as per the specifications of the Manufacturing company (OEM) only for each type of machine. The outside the machine of SkVA voltage stabilizer of stabilizing range 130V-270V. 10) Supply & installation of 5kVA voltage stabilizer of stabilizing range 130V-270V. Supply & installation of 4kVA voltage stabilizer of stabilizing range 150V-270V. Supply & installation of 4kVA voltage stabilizer of stabilizing range 150		_				
fixed on wall /beam etc. with clamps & the distance between 2 clamps shall be less than 1 meter. It shall to fixed with false ceiling members. It shall be fixed with false ceiling members. It shall be laid required gradient for easy disposal of the drain water & testing shall be done before filling the zaries. The drain line shall not be laid in the floor (except toilets & other utility areas where there are no electrical lines in the floor). All drain pipes of split / Cassatte airconditioners should be PVC of suitable size as recommended by manufacturing company and it O8) Providing & Fixing Refrigerant copper piping for Hiwall AC and Cassette AC laid between indoor & outdoor unit as per OEM's specifications (Beyond 3.0 R.Mtr. for each Machine (applicable for split AC only)) duly insulated with Class "O" fire retardant sleeve type elastomeric nitrite rubber insulation. The item also includes copper electrical flexible cable of appropriate size. Alu. foil membrane shall be applied to provide resistance against breakdown due to UV radiation for exposed portion of the rubber insulation with Nitrogen testing (totally sealed - in case of proposed machine). It shall be in total clamping manner above false ceiling & in total concealed manner below false ceiling & in total concealed manner below false ceiling & in total concealed over the false ceiling or it shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be fixed with false ceiling members. The diameter / gauge of the ref. pipe shall be as per the specifications of the Manufacturing company (OEM) only for each type of machine. The O9) Supply & installation of 5kVA voltage stabilizer of stabilizing range 130V-270V. 10) Supply & installation of 4kVA voltage stabilizer of stabilizing range 130V-270V. 11) Providing & Fixing of M.S. Stand for Split AC outdoor Condensing unit. It shall be made out of heavy gauge M.S. channels, angles, flats etc. of						
between 2 clamps shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be fixed with false ceiling members. It shall be laid required gradient for easy disposal of the drain water & testing shall be done before filling the zaries. The drain line shall not be laid in the floor (except toilets & other utility areas where there are no electrical lines in the floor). All drain pipes of split / Cassatte air-conditioners should be PVC of suitable size as recommended by manufacturing company and it 108) Providing & Fixing Refrigerant copper piping for Hi-wall AC and Cassette AC laid between indoor & outdoor unit as per OEM's specifications (Bevond 3.0 R.Mtr. for each Machine (applicable for split AC only)) duly insulated with Class "O" fire retardam sleeve type elastomeric nitrite rubber insulation. The item also includes copper electrical flexible cable of appropriate size. Alu. foil membrane shall be applied to provide resistance against breakdown due to UV radiation for exposed portion of the rubber insulation with Nitrogen testing (totally sealed - in case of proposed machine). It shall be in total clamping manner above false ceiling level. From the structural ceiling it should hanged or shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be fixed with false ceiling members. The diameter / gauge of the ref. pipe shall be as per the specifications of the Manufacturing company (OEM) only for each type of machine. The 109 Supply & installation of \$kVA voltage stabilizer of stabilizing range 130V-270V. 2 No.s 2 No.s 2 No.s 3 No.s No.s 4 No.s 4 No.s 4 No.s 5 No.s 4 No.s 5 No.s 4 No.s 5 No.s 6 Appropriate size & thicknesses duly painted with anti-corrosive paint. not be placed over the false ceiling nor it shall be fixed with false ceiling members. It shall be laid required gradient for easy disposal of the drain water & testing shall be done before filling the zaries. The drain line shall not be laid in the floor (except toilets & other utility areas where there are no electrical lines in the floor). All drain pipes of split / Cassatte air-conditioners should be PVC of suitable size as recommended by manufacturing company and it. 108) Providing & Fixing Refrigerant copper piping for Hiwall AC and Cassette AC laid between indoor & outdoor unit as per OEM's specifications (Bevond 3.0) R.Mtr. for each Machine (applicable for split AC only) duly insulated with Class "O" fire retardant sleeve type elastomeric nitrite rubber insulation. The item also includes copper electrical flexible cable of appropriate size. Alu. foil membrane shall be applied to provide resistance against breakdown due to UV radiation for exposed portion of the rubber insulation with Nitrogen testing (totally sealed - in case of proposed machine). It shall be in total clamping manner above false ceiling & in total concealed manner below false ceiling keel. From the structural ceiling it should hanged or shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be less than I meter. It shall not be placed over the false ceiling nor it shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be less than I meter. It shall not be placed over the false ceiling nor it shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be less than I meter. It shall not be placed over the false ceiling nor it shall be fixed only in the false ceiling more placed to the false ceiling nor it shall be fixed on wall / beam etc. with clamps & the distance between two clamps shall be as per the specifications of the Manufacturing company (OEM) only for each type of machine. The		-				
fixed with false ceiling members. It shall be laid required gradient for easy disposal of the drain water & testing shall be done before filling the zaries. The drain line shall not be laid in the floor (except toilets & other utility areas where there are no electrical lines in the floor). All drain pipes of split / Cassatte air-conditioners should be PVC of suitable size as recommended by manufacturing company and it 108) Providing & Fixing Refrigerant copper piping for Hi-wall AC and Cassette AC laid between indoor & outdoor unit as per OEM's specifications (Beyond 3.0 R.Mtr. for each Machine (applicable for split AC only) duly insulated with Class 'O' fire retardant sleeve type elastomeric nitrite rubber insulation. The item also includes copper electrical flexible cable of appropriate size. Alu. foil membrane shall be applied to provide resistance against breakdown due to UV radiation for exposed portion of the rubber insulation with Nitrogen testing (totally sealed - in case of proposed machine). It shall be in total clamping manner above false ceiling & in total concealed manner below false ceiling & in total concealed manner below false ceiling & in total concealed manner below false ceiling at the structural ceiling it should hanged or shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be fixed with false ceiling members. The diameter / gauge of the ref. pipe shall be as per the specifications of the Manufacturing company (OEM) only for each type of machine. The 109) Supply & installation of 5kVA voltage stabilizer of stabilizing range 130V-270V. 110) Supply & installation of 4kVA voltage stabilizer of stabilizing range 130V-270V. 121) Providing & Fixing of M.S. Stand for Split AC outdoor Condensing unit. It shall be made out of heavy gauge M.S. channels, angles, flats etc. of appropriate size & thicknesses duly painted with anti-corrosive paint. The entire item has to be executed as		_				
required gradient for easy disposal of the drain water & testing shall be done before filling the zaries. The drain line shall not be laid in the floor (except toilets & other utility areas where there are no electrical lines in the floor). All drain pipes of split / Cassatte air-conditioners should be PVC of suitable size as recommended by manufacturing company and it 108) Providing & Fixing Refrigerant copper piping for Hi-wall AC and Cassette AC laid between indoor & outdoor unit as per OEM's specifications (Beyond 3.0 R.Mtr. for each Machine (applicable for split AC onlyy) duly insulated with Class "O" fire retardant sleeve type elastomeric nitrite rubber insulation. The item also includes copper electrical flexible cable of appropriate size. Alu. foil membrane shall be applied to provide resistance against breakdown due to UV radiation for exposed portion of the rubber insulation with Nitrogen testing (totally sealed - in case of proposed machine). It shall be in total clamping manner above false ceiling & in total concealed manner below false ceiling level. From the structural ceiling it should hanged or shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be fixed with false ceiling members. The diameter / gauge of the ref. pipe shall be as per the specifications of the Manufacturing company (OEM) only for each type of machine. The 109) Supply & installation of \$kVA voltage stabilizer of stabilizing range 130V-270V. 110) Providing & Fixing of M.S. Stand for Split AC outdoor Condensing unit. It shall be made out of heavy gauge M.S. channels, angles, flats etc. of appropriate size & thicknesses duly painted with anti-corrosive paint. The entire item has to be executed as /		-	60	Mts		
& testing shall be done before filling the zaries. The drain line shall not be laid in the floor (except toilets & other utility areas where there are no electrical lines in the floor). All drain pipes of split / Cassatte air-conditioners should be PVC of suitable size as recommended by manufacturing company and it 08) Providing & Fixing Refrigerant copper piping for Hiwall AC and Cassette AC laid between indoor & outdoor unit as per OEM's specifications (Bevond 3.0 R.Mtr. for each Machine (applicable for split AC only)) duly insulated with Class "O" fire retardant sleeve type elastomeric nitrite rubber insulation. The item also includes copper electrical flexible cable of appropriate size. Alu. foil membrane shall be applied to provide resistance against breakdown due to UV radiation for exposed portion of the rubber insulation with Nitrogen testing (totally sealed - in case of proposed machine). It shall be in total clamping manner above false ceiling & in total concealed manner below false ceiling level. From the structural ceiling it should hanged or shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be less than I meter. It shall not be placed over the false ceiling nor it shall be fixed with false ceiling members. The diameter / gauge of the ref. pipe shall be as per the specifications of the Manufacturing company (OEM) only for each type of machine. The 09) Supply & installation of 5kVA voltage stabilizer of stabilizing range 130V-270V. 10) Supply & installation of 5kVA voltage stabilizer of stabilizing range 130V-270V. 11) Providing & Fixing of M.S. Stand for Split AC outdoor Condensing unit. It shall be made out of heavy gauge M.S. channels, angles, flats etc. of appropriate size & thicknesses duly painted with anticorrosive paint. The entire item has to be executed as / sanctif the prachine.		_				
drain line shall not be laid in the floor (except toilets & other utility areas where there are no electrical lines in the floor). All drain pipes of split / Cassatte air-conditioners should be PVC of suitable size as recommended by manufacturing company and it O8) Providing & Fixing Refrigerant copper piping for Hi-wall AC and Cassette AC laid between indoor & outdoor unit as per OEM's specifications (Beyond 3.0 R.Mtr. for each Machine (applicable for split AC only)) duly insulated with Class "O" fire retardant sleeve type elastomeric nitrite rubber insulation. The item also includes copper electrical flexible cable of appropriate size. Alu. foil membrane shall be applied to provide resistance against breakdown due to UV radiation for exposed portion of the rubber insulation with Nitrogen testing (totally sealed - in case of proposed machine). It shall be in total clamping manner above false ceiling & in total concealed manner below false ceiling level. From the structural ceiling it should hanged or shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be as per the specifications of the Manufacturing company (OEM) only for each type of machine. The O9) Supply & installation of 5kVA voltage stabilizer of stabilizing range 130V-270V. 10) Supply & installation of 4kVA voltage stabilizer of stabilizing range 130V-270V. 11) Providing & Fixing of M.S. Stand for Split AC outdoor Condensing unit. It shall be made out of heavy gauge M.S. channels, angles, flats etc. of appropriate size & thicknesses duly painted with anticorrosive paint. The entire item has to be executed as /						
& other utility areas where there are no electrical lines in the floor). All drain pipes of split / Cassatte air-conditioners should be PVC of suitable size as recommended by manufacturing company and it 108) Providing & Fixing Refrigerant copper piping for Hi-wall AC and Cassette AC laid between indoor & outdoor unit as per OEM's specifications (Beyond 3.0 R.Mtr. for each Machine (applicable for split AC only). duly insulated with Class "O" fire retardant sleeve type elastomeric nitrite rubber insulation. The item also includes copper electrical flexible cable of appropriate size. Alu. foil membrane shall be applied to provide resistance against breakdown due to UV radiation for exposed portion of the rubber insulation with Nitrogen testing (totally sealed - in case of proposed machine). It shall be in total clamping manner above false ceiling & in total concealed manner below false ceiling level. From the structural ceiling it should hanged or shall be fixed on wall / beam etc. with clamps & the distance between two clamp shall be less than 1 meter. It shall not be placed over the false ceiling nor it shall be fixed with false ceiling members. The diameter / gauge of the ref. pipe shall be as per the specifications of the Manufacturing company (OEM) only for each type of machine. The 109) Supply & installation of 5kVA voltage stabilizer of stabilizing range 130V-270V. 10) Supply & installation of 4kVA voltage stabilizer of stabilizing range 130V-270V. 110) Providing & Fixing of M.S. Stand for Split AC outdoor Condensing unit. It shall be made out of heavy gauge M.S channels, angles, flats etc. of appropriate size & thicknesses duly painted with anticorrosive paint. The entire item has to be executed as / the decidence of the supplied of the provision of the supplied of the provi						
in the floor).
